EXPERIENCE

Grocery Clerk Associate (Part-Time-Night) | Real Canadian Superstore, Regina, SK **August 2026 - Present**

- Unload, sort and stock 300+ cases of freight per shift, so shelves are 100% full before the store opens.
- Rotate products using FIFO and check expiry dates across 10+ aisles, cutting expired-product waste by about 15%.
- Face and organize 500+ products each night so the store looks clean and is easy to shop.
- Track stock levels and report low or damaged items, which improved inventory accuracy for morning reorders.
- Work with a 4–6 person night team on safety and equipment procedures, with zero safety incidents.

Automotive Detailer| Twin Motors, The Pas , MB **May 2026 - July 2026**

- Detailed 6–8 vehicles per shift inside and out (washing, waxing, vacuuming, shampooing upholstery), getting showroom and delivery units ready for sale.
- Prepared 100+ pre-owned and new vehicles for the lot, which helped units sell faster.
- Inspected each vehicle for scratches, dents and interior damage and reported issues to the sales and service teams before delivery.
- Worked with sales staff to have vehicles ready for customer pickups on time, with 100% of deliveries meeting the schedule.
- Followed safety rules for handling and storing chemicals and kept the detail bay clean and organized.

EDUCATION

Diploma in Computer Science **Aug 2024 – Dec 2026**

- Graduated with a 3.00 GPA.

CERTIFICATIONS

- IBM Full Stack Software Developer (in progress)
- Developing Front-End Apps with React — May 2026
- Getting Started with Git and GitHub — May 2026
- Introduction to HTML, CSS & JavaScript — Apr 2026
- Introduction to Cloud Computing — Feb 2026
- Introduction to Software Engineering — Jan 2026

SKILLS

Programming Languages	JavaScript (ES6+), Python, C/C++, SQL, PHP, HTML5, CSS3, MIPS Assembly
Databases & OS Management	SQL, NoSQL, PostgreSQL, MongoDB, Linux, Kali, Windows
Cloud & Infrastructure Security	AWS, Docker, Kubernetes, OpenSearch, GitHub
Frameworks & Libraries	React, Tailwind CSS, GraphQL, Google Apps Script
Tools	Git, GitHub, VS Code, Linux command line, Vercel
Concepts	REST APIs, asynchronous programming, JSON, databases, Agile, software development life cycle

PROJECTS

LeetMetric - *leetmetric-two.vercel.app*

- Built a React and JavaScript analytics dashboard that uses GraphQL and REST APIs to show a user's LeetCode progress across Easy, Medium and Hard problems.
- Applied WCAG accessibility standards (semantic HTML, colour contrast, keyboard navigation) so more people can use the dashboard.
- Deployed it on Vercel with continuous deployment from GitHub, so every update goes live automatically.
- Added error handling for failed API calls and invalid usernames, so users see a clear message instead of a broken page.

Razorpay Checkout Recreation- *razorpay-clone-mu-lake.vercel.app*

- Rebuilt a production payment checkout interface from scratch with HTML, JavaScript and Tailwind CSS, closely matching the original layout and interaction patterns
- Built a fully responsive layout that I tested on 5+ screen sizes, from mobile to desktop.
- Organized reusable UI sections and utility classes so the code is easy to maintain and extend.
